

# Command Center

Command Center is a powerful tool that provides business flexibility to users with a wide range of advanced phone features and functionalities.

Stay connected at all times and never miss important client and business partner calls by effectively utilizing features such as Click-to-Dial, Find Me, Call Jump, and Visual Voicemail. Designed as a platform independent web-based portal, Command Center can be accessed from any Internet browser at any time.

## Features in details...

**Voice Assistant** – Using your mouse, you can easily manage and control your calls with features such as answer, place, hold, end, transfer, and conference call.

**Remote Mode** – Set your location status with a remote phone number that will simultaneously ring along with your desk phone for incoming calls.

**Call Jump** – Increase flexibility by seamlessly “jumping” your active call from your Cisco IP phone to another pre-defined phone number. The call can be jumped back to your desk phone.

**Meet-Me Conference** – Schedule a one time or recurring conference calls with up to 99 participants. The host can monitor, edit, and control the call.

**Directories** – Corporate contacts are auto populated and Personal contacts can be synchronized directly from your Outlook or imported from other sources.

**Virtual Fax** – Send and receive faxes directly through your Command Center. Faxes can be sent to multiple numbers with multiple attachments.
